1 This is a national program, and we have seen a great deal of national interest already, therefore this supplemental DEIS should be presented in national public hearings. Also, hearings should be held in every town in Nevada. Why are they limited to Amargosa Valley, Pahrump and Las Vegas? Nevada has two major population centers, and the people in rural areas, being less worthy than those in urban areas, have just as much right to express their opinions on these documents, on the record in local public hearing. Also, some information available at hearings (such as the poster session) is not available to anyone than at the hearings. While the DOE is questionably upholding its legal responsibilities according to the Nuclear Waste Policy Act, this is another example of the DOE failing to uphold its moral and ethical responsibility to the public.
